

## Total Amylase Method Codes for Human Reagent Users

Dear Participant,

As part of our commitment at RIQAS to continually make improvements to our EQA programmes, we have been liaising with Human on the method codes available for Total Amylase in the Clinical Chemistry programme.

In light of a new standardization to IFCC for their amylase reagent, we have created two new method groups for Human reagents:

2 - chloro - pNPG3 Human (AM8N)

2 - chloro - pNPG3 Human IFCC (AM8O)

We would ask you to update your assay details to reflect these new codes. If you have any issues updating your method please contact us at [mail@riqas.com](mailto:mail@riqas.com)

If you require any further information please do not hesitate to get in touch.

Kindest Regards

Sonia Mc Laughlin  
RIQAS Scientist

Stephen Doherty  
RIQAS Manager
